

### CAUTION!

(1) For normal (NOT RW/PW) Fender middle pickups use the following SHR-1 wiring: green to ground, red+white to J, black (hot) to P+Q to get a humbucking position 4.  
*RW/RP= reverse wound, reverse poled*

All 4 layers of the Eyb-Megaswitch M are electrically equal and therefore free changeable

## Modified WIRING US-Strat

with LRB-Hex-Pickup,  
Variax 300 electronic and  
SHR-1B Hot Rail in Bridge Position
